### **DETAILED ACTION**

Claims 1-24, 27, and 29-41 are pending. Claims 1, 8, 9, 12, 15, 16, 19, 20, 24, 27, 31, 33, and 35 are currently amended. Claims 25, 26, and 28 are cancelled. Claims 36-41 are new.

#### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 41 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. As per claim 41, such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed aspects of the invention which permit the computer program's functionality to be realized. Since a program itself is not a process, without the computer-readable storage medium needed to realize the computer program's functionality. In contrast, a claimed computer-readable storage medium encoded with a computer program defines structural and functional interrelationships between the computer program and the medium which permit the computer program's functionality to be realized, and is thus statutory. **Warmerdam**, 33 F.3d at 1361, 31 USPQ2d at 1760. **In re Sarkar**, 588 F.2d 1330, 1333, 200 USPQ 132, 137 (CCPA 1978). See MPEP 2106(IV)(B)(1)(a).

***Allowable Subject Matter.***

Claims 1-24, 27, and 29-41 are allowed.

The following is an examiner's statement of reasons for allowance: Examiner is unable to find prior art or any obvious combination thereof that discloses a method

including receiving a request for registration from a user equipment at a serving controller. The request for registration including information indicative of at least one protocol supported by the user equipment. The method further includes determining, based on the information, in the second controller that the user equipment supports a second protocol other than a first protocol. The method also includes removing the information from the request for registration in the second controller, including in the request for registration an indication that the second protocol is used by the user equipment and forwarding the request for registration including said indication to the serving controller, and sending a challenge in accordance with the second protocol from the serving controller to the user equipment via the second controller.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim 41 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
